

Release Notes

for Kerio Connect 7.1.0

© Kerio Technologies. All rights reserved.

Date: July 28, 2010

1 Important changes in this version

Kerio Connector for BlackBerry

Kerio Connect can synchronize data with BlackBerry Enterprise Server (BES) to BlackBerry devices using the new Kerio Connector for BlackBerry. The connector is installed on the same server running BES and provides over-the-air synchronization of mail, contacts, calendars and tasks between Kerio Connect and the native clients on BlackBerry devices.

Supported:

- BlackBerry Enterprise Server version 5
- BlackBerry Enterprise Server Express
- All BlackBerry devices supported by BlackBerry Enterprise Server

Support for Outlook 2010

Kerio Outlook Connector (Offline Edition) supports Outlook 2010.

Outlook 2010 is not supported by the online version of KOC.

Support for iPhone 4

Kerio Connect provides over-the-air synchronization of contacts and calendars between the iPhone 4 (iOS4) and Kerio Connect 7.1 using the new CardDAV and CalDAV protocols.

Public and Shared Folders in Mobile Devices

Sync public and shared folders to Microsoft Exchange ActiveSync devices.

Easily manage the list of folders to synchronize directly from the mobile device or from within Kerio WebMail.

New Sophos Anti-Virus

A new high performance scan engine from Sophos.

Includes genotype virus detection technology, decision caching, dynamic code analysis, and heuristics analysis.

Mail Retention Policy

Conserve space and prevent excessive storage of old information by automatically deleting old email items.

- Set mail retention policy options per domain or per user.
- Set mail retention policy options for Sent Items folder.
- In the 'All Folders' setting, specify the age of items to be deleted in days or years.

Leave POP3 Messages on Remote Server

New POP3 delivery option to leave messages on a remote server.

Ability to delete messages after a certain period of time.

CardDAV Improvements

Minor CardDAV improvements among others contain better Address Book support, auto-configuration script bug fixes, better HTTP service setting.

Standalone Administration Console is discontinued

Complete Admin Console functionality is now available through the Web Administration. Based on these improvements to the Web Admin, the standalone Admin console is no longer necessary and is removed from the installation package.

- Perform all Administrator functions through the Web Admin.
- No separate installation package is required.
- Remotely administer Kerio Connect from anywhere, via the web.

Internal Antivirus Updates

If you are using a trial version, you need to register it to get the option to update the internal antivirus.

2 Changes in System Requirements

New Supported Platforms

- Outlook 2010
- Safari 5

- iPhone 4
- openSUSE 11.2
- Red Hat Enterprise Linux 5.5
- Ubuntu 10.04 LTS

Platforms with Discontinued Support

- Standalone Kerio Administration Console (all platforms)
- openSUSE 10.0-10.3
- Visnetic antivirus plugin

3 Known Issues

- Using Kerio Outlook Connector (Offline Edition) with Outlook 2010 requires full installation of Kerio Outlook Connector (Offline Edition); sharing of other mailboxes will not work otherwise.
- Kerio Connector for BlackBerry: work with signed and encrypted messages is unreliable.
- Outlook 2010 automatically creates folders "Suggested Contacts" and "News Feed". If they are deleted, they are created again.

4 Upgrade

- Kerio Connect 7.1.0 can be installed according to the standard plan. For details see <http://support.kerio.com/kb/5>.
- Kerio Connect will re-create CalDAV and CardDAV databases upon the first startup. It can cause temporary unavailability of calendar and contact items in CalDAV/CardDAV clients.
- Kerio Connector for BlackBerry must be upgraded using the same Windows account as the one used for its initial installation.

5 Downgrade

- Kerio Connect will re-create CalDAV and CardDAV databases upon the first startup. It can cause temporary unavailability of calendar and contact items in CalDAV/CardDAV clients.

6 Open Source Software Notice

Kerio Connect includes open source software. The complete open source code packages of these components are available in Kerio Software Archive at <http://download.kerio.com/archive/>.
