Release Notes

for Kerio Connect 9.2.3

New in Kerio Connect 9.2

Kerio Antivirus

Kerio Connect 9.2.2 and higher brings Kerio Antivirus, a new integrated antivirus engine. Kerio Antivirus is powered by Bitdefender and replaces the curent Sophos antivirus.

MyKerio integration

Administrators can manage all Kerio Connect deployments through the MyKerio service. Admins can remotely access the administration of multiple Kerio products (Kerio Connect, Kerio Control, and Kerio Operator) easily in one place.

You can also use MyKerio app for iOS and Android to monitor your appliances.

Kerio Anti-spam and Bayesian filtering working together

Kerio Connect 9.2.0 introduces the possibility to use Kerio Anti-spam and Bayesian filtering at the same time to detect more spams.

Read more in our Knowledge Base: Kerio Anti-spam filter

Spark for iOS now supports Kerio Connect

You can easily set up your Spark email app on iOS devices using the integrated Kerio Connect profile.

Read more in our Knowledge Base: Integrating your account with Spark by Readdle

Improved synchronization to iOS devices

You don't have to wait for periodic synchronization of your account anymore. Kerio Connect now synchronizes your emails and contacts in real time.

Changes in System Requirements

Added support

- macOS Sierra
- iOS 10
- Android 7
- Safari 10

Discontinued support

- Microsoft Internet Explorer 10

For more details, read Kerio Connect technical specifications.

Upgrading

When upgrading from Kerio Connect 9.2.1 or lower, the Kerio Antivirus automatically replaces the Sophos antivirus engine.

When you upgrade your server to Kerio Connect 9.2.3, verify that all users with Kerio Connect Client for Windows and Mac update their applications. If their applications are not updated, they must update them manually. Otherwise, they will lack some functionality, for example, chat and presence status.

Release history
